

## RCRA Enforcement Tracking and Projections

### RCRA Enforcement work within State-Authorized Programs

RCRA Technical Enforcement typically only takes enforcement within state-authorized programs as part of National or Region Enforcement Initiatives, multi-state issues (interstate issues), complaints or state referrals to EPA. All cases in a state-authorized program are regularly discussed with states at quarterly calls. The RCRA program currently has “no” workshare agreements with authorized states.

### RCRA Cases Within State-Authorized Program

Facility/Case Name	State	Planned/Current Enforcement Activity	Rationale for EPA Lead
